Twin Track

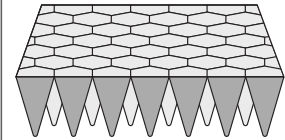

Cell Structure

**Representation Only*

Non Twin Track

Cell Structure

**Representation Only*

Benefits of Twin Track

- Improved cell formation; flat & wide bottomed cells for improved ink release
 - 20% Less depth vs non Twin Track cells
- Longer print runs before cleaning
- Cleanings are more efficient; Less time & effort spent
- Cells are less prone to plugging
- Best on lower LPI applications, Line Work, Over-all, and Coating applications

Less Press Downtime = \$\$\$ saved!
