

flex-Metrics

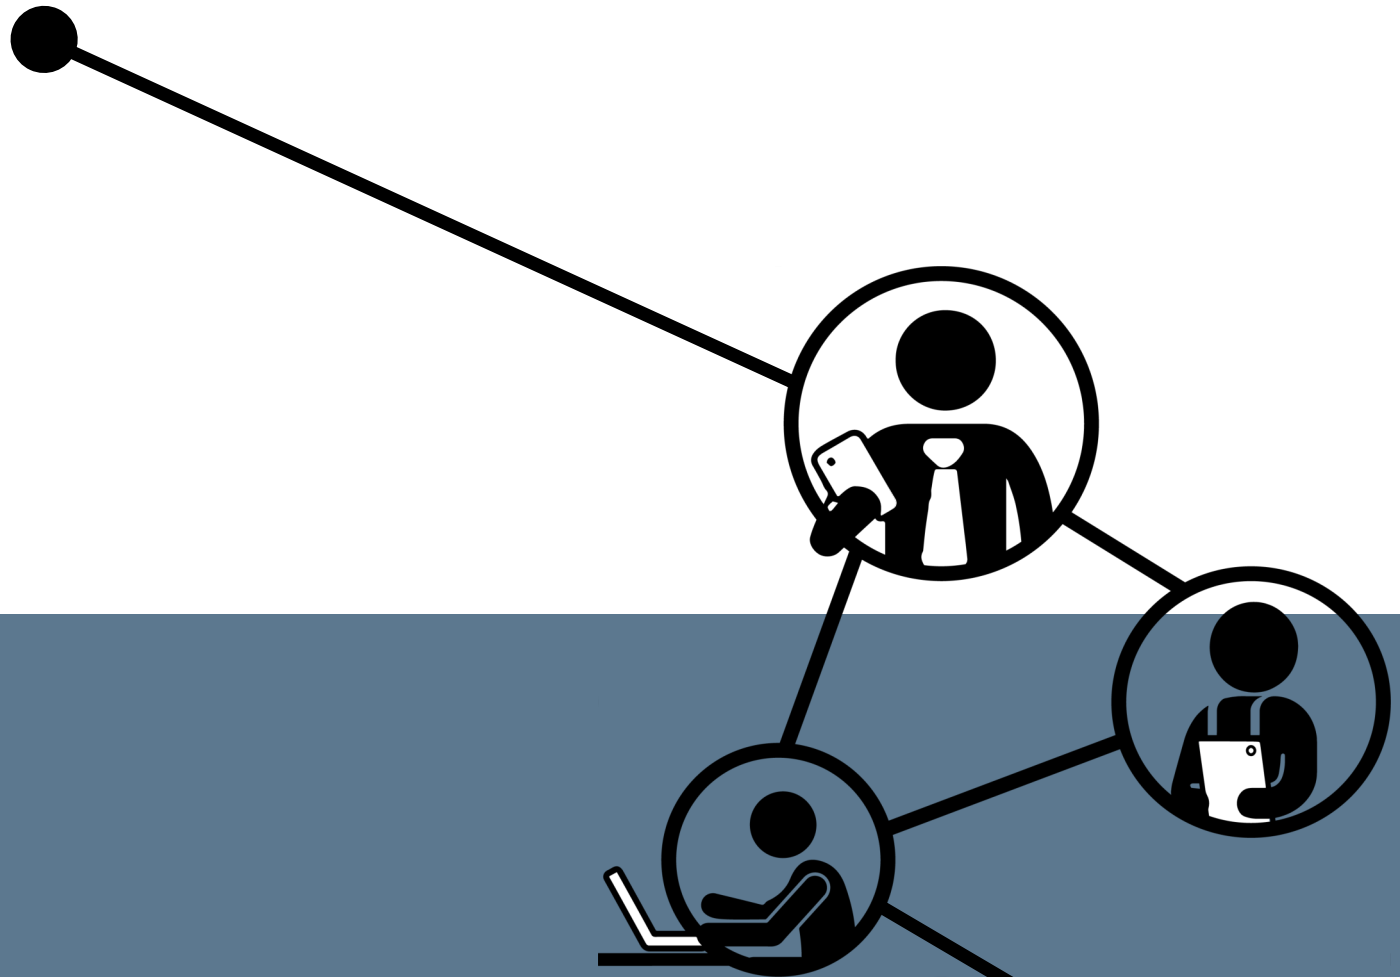

**Better Data.
Better Decisions.
Connected Workforce.**

Inform. Communicate. Collaborate. ▶

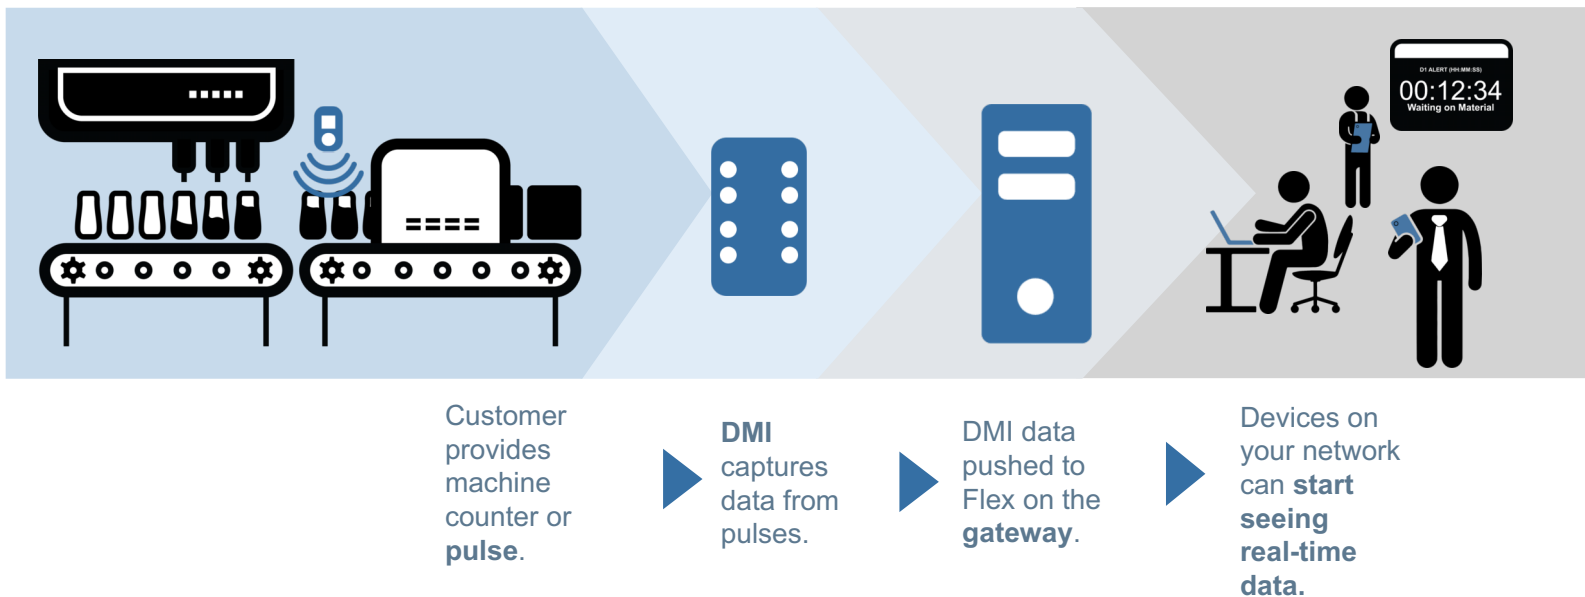

Who are we?

Flex-Metrics is an automated data collection software company that connects your workforce by enabling easy-to-use tools around production data and machine performance, in real-time.

Backed by a team with decades of experience, Flex strives to show how with accurate and trustworthy data you can make operational improvements to impact the bottom line.

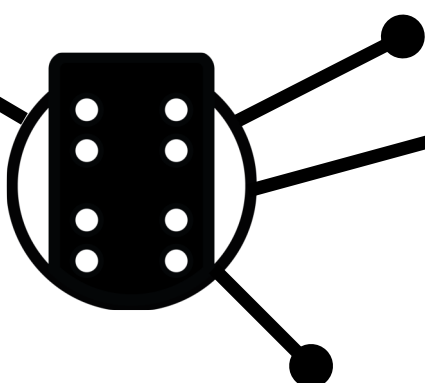

How flex Works

Connected workforce made simple. ▶

Flex is a reliable and easy-to-use solution that eliminates human error while connecting the shop-floor to the top-floor.

- **Inform** - provided by a direct connection between your production lines and the Flex DMI, see the real-time status of your machines with customized Andon Displays.
- **Communicate** - use the information Flex shows you to bring resources to the areas that need help with automated alerts, customized reports.
- **Collaborate** - use Flex-Insights to solve big problems with data-driven decision making.

Easy-to-use interfaces

- Simplified data entry for employees, enabling them to focus on production rather than inputting information.
- Easy-to-read and understandable real-time performance graphics.
- Access to a library of pre-built reports with up-to-date data, available on demand.
- Straightforward report and dashboard filters and settings for targeted focus.

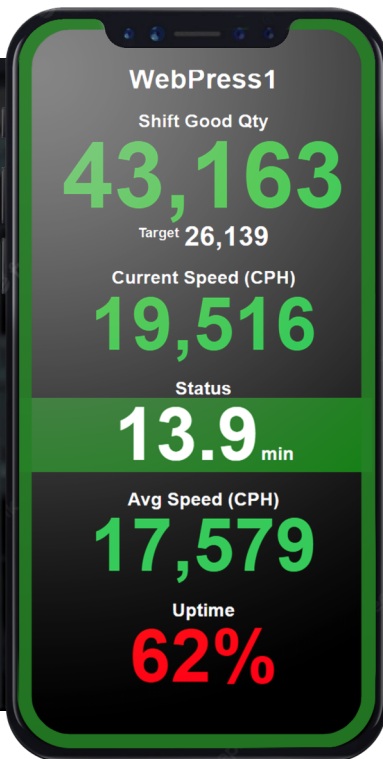

Customized to your needs

- Configurable metrics & reporting
- Automated reports sent to your inbox on a frequency of your choosing
- Escalation Alerts for when you need to be notified of an outlier
- View your data in both a numerical and interactive way

Waiting on Material

Flex-Andon

Factory visualization made for you. ▶

Introducing Flex-Andon, a powerful and versatile Visual Factory included in our core offering.

- Browser based--access anytime, anywhere
- 20 configurable metrics (i.e., OEE, Speed, Uptime, Job based targets, and more)
- Connect via desktop, tablet, or mobile device
- Real-time data at a glance
- Production line monitoring at the Equipment level or Area level

Pilot Program

► Say hello to better data.

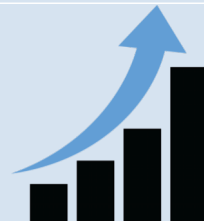

This program allows clients to test our software, understand strategies for adopting Flex, and receive tailored recommendations for installation based on deploying Flex to one to two production lines.

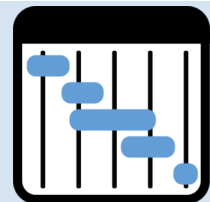

Explore all the benefits of Flex, without having to submit a capital request.

A dedicated team will teach all levels of the organization best practices for focusing on the areas that matter to you.

Establish a baseline at the start of the Pilot. Later compare with noticeable changes at the end of the Pilot.

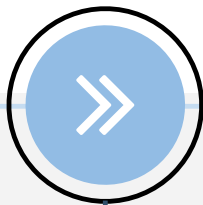

Create a detailed project plan with your Flex team to fully deploy Flex in your facility.

Pilot timeline

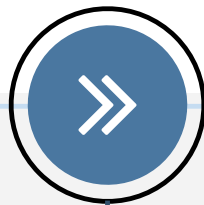

Start-Up

- Planning
- Hardware Procurement
- Kick-Off

Provisioning

- Hardware provisioning
- Installation of hardware
- Network set-up

Configuration

- Count certification to ensure data accuracy

Flex-Insights

Interactive and visual data. ▶

Unlock the full potential of your workforce with our adaptable cloud-based reporting tool. With pre-built reports and custom report building services, Insights caters to individuals who prefer a more visual and interactive display of their data. It offers seamless analysis of production data across multiple sites and organizational levels.

- Customizable Data Visualizations
- Comprehensive Downtime Analysis
- Interactive Drill-Down Abilities
- Adaptable Report Creation
- Automated alerts and notifications
- Predictive Analytics
- Multi-site Visibility and Comparisons

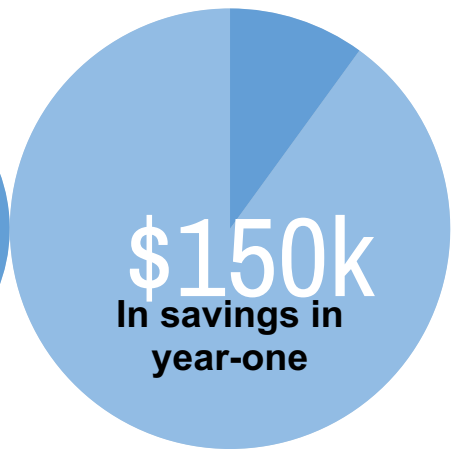

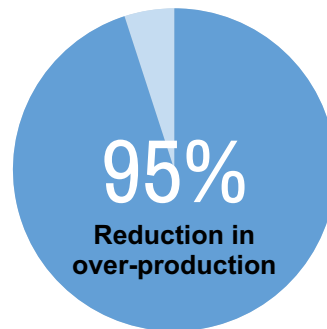

▶ Better data. Better decisions. Proven Results.

“We continued to have over-production waste issues until we used Flex to automatically stop a job before that happened. It ended up **saving us a boat load of time and money.**”

A Top 5 Print Manufacturer

”

“With all the information given from the daily shift reports, Flex-Insights, and Flex-Client, there is so much information to gather to better understand where the gaps and needed improvements are. [...] There are so **many ways to look at the data** and just to have access to that helps **make my job easier** to explain and discuss what is needed on the production floor.”

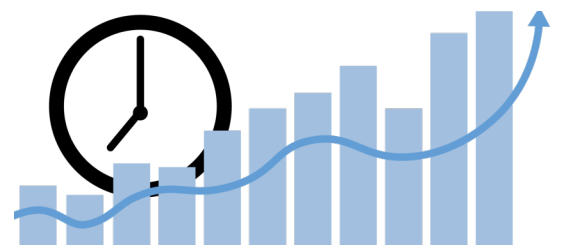

Francois Vang, Continuous Improvement Manager

”

“Having access to Flex insights enables us to capture and delve into day-to-day and **real-time analysis** concerning operator performance and daily output. I firmly believe that Flex has **contributed to our business growth** because it offers a **comprehensive view** of our equipment's operations on a daily basis.”

Tracy Jacobs, Plant Manager

”
